PROFESSIONAL SUMMARY

Final year Information Technology student at University of Colombo School of Computing seeking internship opportunities in software development. Strong expertise in full-stack web development with hands-on experience building scalable applications using React, Node.js, Laravel, and database management systems. Proven ability in problem-solving, teamwork, and delivering user-focused solutions through academic projects.

TECHNICAL SKILLS

Programming Languages: JavaScript, HTML, CSS, SQL

Databases: MongoDB, SQL

Frameworks & Libraries: React, Node.js, Laravel, Material-UI, Bootstrap

Tools & Technologies: GitHub, Figma, Git Version Control

PROJECTS

Hospital Appointment Booking System

Technologies: React, Material-UI, SQL, Node.js

Designed and developed a full-stack hospital appointment booking system enabling users to search doctors, schedule appointments, manage sessions, and handle patient records efficiently. Created separate dashboard for administrative functions.

<https://github.com/YuthmiRajapaksha/car-sale-be-matrix>

Chat-App

Technologies: React, Node.js, Express, MongoDB, Socket.IO, Material-UI, Axios

Developed a full-stack chat application supporting user registration, login, and friend management. Users can send and receive real-time messages, manage friends, and enjoy a responsive, modern UI. The backend ensures secure authentication, persistent message storage, and real-time updates across active sessions.

EDUCATION

Bachelor of Information Technology (Final Year)

University of Colombo School of Computing

Expected Graduation: 2026

Higher Diploma in Information Technology

University of Colombo School of Computing

Completed

Diploma in Information Technology

University of Colombo School of Computing

Completed
